I usually drink bourbon with them so some times it might be hard to remember all the details if you have a few to many bourbons and smoke a couple of cigars. But seriously this really is a great way for even veterans to keep up with all the different sticks they have smoked and go back and find the ones you loved and see how your taste has progressed to different flavors over time. This is also about half the price of the other journals I looked at, nothing fancy(paper back), but get's the job done.0 of 0 people found the following review helpful. From the Author When I sat down to create The Cigar Journal, I wanted it to be several things; a way to track the cigars that had been smoked, a way to collect cigar bands, to see how a cigar changed over time, but most importantly though, I wanted to give people a better way to keep track of their tastes in cigars.
