Classic Movie Posters

David Kaye : Classic Movie Posters before purchasing it in order to gage whether or not it would be worth my time, and all praised Classic Movie Posters:

This is a full color collection of nearly 200 movie posters ranging from the silent to more recent films. Many of the movies represented are classics while other posters are included primarily for their artwork. Movie posters - especially in the golden age of Hollywood - were works of art and some of the best and more memorable ones are featured in this book which regards the posters with both admiration and affection. These posters recall films that were sometimes

great, frequently enjoyable, rarely boring, and always worth the price of admission.
