The photography is excellent and the colors are just spot-on! As a new collector, this book and the other three are fantastic sources for me. The only improvement would be the marks for each one beside each one. I use these as reference for myself and I have to say they are used on a weekly, if not daily basis. Many books have such poor design, they contain the author's collection, the author's trip to a museum or a similar vein. This book and the previous three follow a design. You know where to go within each book to find a certain style, design, manufacturer, artist. I love this system! If only all collector authors were required to be so methodical! If you are a collector or just a lover of cups saucers, these are the books for you!0 of 0 people found the

I do like the book very much though as it will be helpful in identifying other markings and possible aid in finding "treasures" in the future. I don't regret purchasing this book which arrived sooner than I expected and in great condition.

Book III in Jim Susan Harran's series is all-new, with no repeats from their first two books. Over 1,000 color photographs are included this time, and the book concentrates on cups and saucers that are readily available to collectors. An expanded section on cabinet cups and saucers is provided, and some of the categories from books I and II are again covered: late nineteenth and twentieth century European and American dinnerware, English bone china and earthenware cups and saucers, miniatures, and mustache cups. There are also two brand new categories in the book, Japanese cups and saucers and art glass cups and saucers made by the leading glass factories in Europe and the United States. A marks section, helpful appendix, and bibliography are once again included, as well as useful tips for dealers and collectors. 2007 values.

This book is the third in a three-volume series by authors Jim Susan Harran, and is filled with hundreds of beautiful color photographs.
