UPDATE on the UPDATE: August 27th, 2015, TOM COTTER, Author of the wonderful 'The Cobra In the Barn'

series just wrote a Foreword for the book! "I have it easy; I drive down country roads, find old cars, meet the owners and write the stories. Actually, the stories almost write themselves; I'm just a catalyst who types words into the computer. In FOUND, though, Greg Long has taken a much tougher path in telling the stories of lost and forgotten cars; they are all products of his fruitful mind. His ability to develop scenarios and characters, while weaving in the histories of interesting and curious cars, is amazing. Short-story after short-story that seemingly have no connection with one another, all come together in the final chapters to form a logical and pleasing conclusion. Long has done his homework, whether it's describing mechanical details of an obscure vintage Citroen to a vintage racer. Guest appearances are also made by some of the most fabled and elusive cars of all time, including Steve McQueen's Bullit Mustang and James Dean's "Little Bastard" Porsche 550 Spyder."
