I had the pleasure of speaking with on of the antique porcelain collectors that created this book a few years ago, and his passion for fine quality European porcelains was exactly what I was looking for to further enhance my love for fine European porcelains. He recommended this to me and a few years later, I have FINALLY been able to purchase it. The pictures are beautifully photographed and placed within concise descriptions and history of where they were made, hand painted and which high end companies in the U.S. imported them to make them available for our pleasure.The pages are of a fine quality of paper, that as soon as you turn the first page, it is like

turning back the pages of history. You can immediately tell that this book is a "reverently" made work of art in itself. Anyone who appreciates fine books, even if they are not in love with antique porcelain, will come away with a sense of knowledge they never expected and a clear and concise sense of the true beauty of original pieces created by the most talented artists in the world !! 1 of 1 people found the following review helpful. Elegant, hand-painted porcelain plates were popularly produced as decorative fine arts during the nineteenth and twentieth centuries. Created by some of the most influential potteries and decorating houses in England and Europe, examples here include plates from Brown-Westhead, Moore Company*TM, Davenport*TM, Doulton*TM, Feuillet*TM, Camille Le Talliec*TM, Meissen*TM, Minton*TM, Sevres*TM, and Wedgwood*TM. Over 675 beautiful full color images display lovely portraits, romantic landscapes and city scenes, still-life paintings, and floral arrangements. The engaging text provides concise histories of the factories, decorating studios, the artisans with the marks employed by each, an extensive bibliography, and an index. Current values are found in the captions. This book will be enjoyed by anyone who appreciates fine art and will inspire artists, collectors, and designers.
