[Read ebook] Sir Philip Sidney and the Circulation of Manuscripts, 1558-1640

## **Sir Philip Sidney and the Circulation of Manuscripts, 1558-1640**

**H. R. Woudhuysen : Sir Philip Sidney and the Circulation of Manuscripts, 1558-1640** before purchasing it in order to gage whether or not it would be worth my time, and all praised Sir Philip Sidney and the Circulation of Manuscripts, 1558-1640:

This is the first modern study of the production and circulation of manuscripts during the English Renaissance.

Woudhuysen examines the relationship between manuscript and print, looks at people who lived by their pens, and surveys authorial and scribal manuscripts. In particular he examines Sir Philip Sydney's works, discussing all Sidney's important manuscripts, and seeking to assess his part in the circulation of his works and his role in the promotion of a scribal culture. A detailed examination of the manuscripts and early prints of his poems sheds new light on their composition, evolution, and dissemination, as well as on Sidney's friends and admirers.

"Surely no serious scholar of early modern culture should be unaware of Woudhuysen's splendid achievement--one in which the printed book is victorious, but only because manuscripts are its chief concern."--English Language Notes  
"Readers of H. R. Woudhuysen's regular contributions to the TLS (one of that fine paper's chief attractions) will welcome the appearance of this splendid work. So too should all students of early modern technological, intellectual, and political history....[He] writes with charm and clarity."--Sixteenth Century Journal  
"The survey of Sidney's manuscripts is the most thorough to date."--Renaissance Quarterly  
From the Back Cover  
Sir Philip Sidney and the Circulation of Manuscripts, 1558-1640 is the first modern study of the production and circulation of manuscripts during the English Renaissance. H. R. Woudhuysen examines the relationship between manuscript and print, looks at people who lived by their pens, and surveys authorial and scribal manuscripts, paying particular attention to the copying of verse, plays, and scholarly works by hand. He investigates the professional production of manuscripts for sale by scribes such as Ralph Crane and Richard Robinson. The second part of the book examines Sir Philip Sidney's works in the context of Woudhuysen's research, discussing all Sidney's important manuscripts, and seeks to assess his part in the circulation of his works and his role in the promotion of a scribal culture. A detailed examination of the manuscripts and early prints of his poems, of his Arcadias, and of Astrophil and Stella sheds new light on their composition, evolution, and dissemination, as well as on Sidney's friends and admirers. Based on the examination of hundreds of manuscripts, this book presents much new material describing manuscript production in the fields of literature, politics, the law, and historical, scientific, and antiquarian studies.  
About the Author  
H. R. Woudhuysen is at University College, London.
