Intricate carvings of soapstone (or "magnesium silicate" for you chemistry buffs) are the subject of this Collector's Digest. Originally a far eastern art, soapstone carvings are appreciated worldwide and are now sought after for their remarkable natural color and the workmanship instilled within. Statues, bookends, and vases are but a small example of the forms these carvings became. Well over 150 pieces have been selected and photographed in full color, with individual values assigned. Helpful hints for determining reproductions are also included. 1995 VALUES -- Book
