(Mobile pdf) Techniques of Drawing from the 15th to 19th Centuries

## **Techniques of Drawing from the 15th to 19th Centuries**

**Ursula Weekes : Techniques of Drawing from the 15th to 19th Centuries** before purchasing it in order to gage whether or not it would be worth my time, and all praised Techniques of Drawing from the 15th to 19th Centuries:

0 of 0 people found the following review helpful. Brief But Interesting ReadBy Barbara D. ZambranaI received my copy of "Techniques of Drawing from the 15th to the 19th Centuries" in good time, condition and for a good price.

This is a reliable seller - Thank You0 of 0 people found the following review helpful. Very interesting review of historical drawing materials.By AttuThis book presents a very interesting review of historical drawing materials. I found it to be a good addition to my drawing library.3 of 3 people found the following review helpful. MistitledBy R. KaneThis is an interesting little monograph (about 45 pages)about the history of different drawing media--metalpoint, charcoal, chalk, graphite, pastel, crayon, ink, gouache, and watercolor--but I feel the book should be titled "A Brief History of Drawing Media." It is not about the techniques of drawing, i.e., how to draw, as taught in various academies over the last few centuries. If anyone knows of such a book, please let me know the title and where I can obtain it.

Thanks.

After Gutenberg, preparatory drawings came to be valued in their own right, not for mere coloring. This concise overview of the major techniques, surfaces and tools of drawing spanning five centuries has exquisite examples of metalpoint, charcoal, etc.

About the Author Ursula Weekes is the author of 'Early Netherlandish Engravings', and was formerly supervisor of the Ashmolean Print Room.
