This instruction manual is the first in the LDS Temple Series from Temple Bricks. Designed after the San Diego California Temple, one of the most uniquely designed temples for The Church of Jesus Christ of Latter-day Saints, it captures many of the temples unique features including the twin spires, the eight smaller spires, the atrium, and elevated terrain. Children and adults alike will love assembling this beloved building over and over again. Using only 161 pieces over 25 steps, this model was meticulously planned and designed to be an easily recognizable representation of the San Diego California Temple while also providing the challenge and fun people look for in a building toy. Please Note: This is the instruction manual only. Does not include bricks.

About the AuthorChris London has always loved creative toys that help kids unplug from technology. In his continuing pursuit to find the best toys he realized that there is a lack of engaging toys for certain demographics, specifically within the LDS community. As an AFOL, he found the perfect match in toy construction bricks.
